

#### Exercise 1.6.1

w = 13

x = 11

y = 13

z = 11

#### Exercise 1.1.4

With C being more universal, using C as a target language for a compiler means that the program may be run on any machine capable of running C code.

#### Exercise 1.11

MOSS is an automatic system for determining the similarity of programs. MOSS looks for similar code structure whereas a typical plagiarism software would look for exact matches. Each submitted document is compared against every other document and the number of token and line matches as well as percentage of assumed plagiarism is returned.

#### Exercise 3.1

Token sequence:

Return int

Return float
